LIMS APPROACHING NEW PARADIGM WITH MOBILE, CLOUD, AND ELN

This Laboratory Information Management Systems (LIMS) Global Market Research Study is focused on the labs in the manufacturing sector, where labs typically fall under two groups, and they are the ubiquitous R&D lab and the QA/QC lab.

This market has some dynamic elements that provide a good CAGR over the forecast period, and they are adopting mobile devices, bringing LIMS into the cloud, and integrating LIMS and ELN, among others.

Manufacturing LIMS tend to be quite different from other software applications, in that very few can provide an out-of-the-box solution for even one lab, because labs tend to have very individualistic characteristics that require a fair amount of consulting and implementation services to have the solution fit the user’s requirements.

This uniqueness is what makes LIMS such a valuable solution for the user and supplier.

The need to comply with government regulations is a key factor driving the LIMS market, as the governments of many countries have enforced regulations on every industry to improve security and provide better products to the export market. LIMS helps laboratory professionals to understand and follow government regulations.

STUDY CONTENTS

EXECUTIVE SUMMARY
Major Trends
Strategies for Success

SCOPE

MARKET SHARES LIST OF FIGURES
Market Shares of the Leading Suppliers
Market Shares by Region
North America
Europe, Middle East, Africa
Asia
Latin America
Market Shares by Revenue Category
Software
Services
Market Shares by System Size
Small (1 to 5)
Medium (6 to 20)
Large (21 to 50)
Grand (>51)
Market Shares by Lab Type
Research & Development
Quality Assurance/Quality Control
Market Shares by Industry
Aerospace & Defense
Automotive
Chemical
Electric Power Generation
Electronics & Electrical
Food & Beverage
Metals
Mining

MARKET FORECAST LIST OF FIGURES
Total Revenue of Manufacturing LIMS
Shipments by Region
Shipments by Revenue Category
Shipments by Service Type

STRAategic ISSUES

Manufacturers are exhibiting a cautious optimism toward LIMS in the cloud. In order to help their cause, suppliers must increase their value proposition to users by adopting some of the strategic recommendations included within this LIMS Global Market Research Study.

- How can suppliers increase their value proposition?
- How valuable are pre-configured implementation templates?
- Where is the regional growth going to be?
- How critical is service to a successful implementation?
- What vertical industries provide the best opportunities?

The Worldwide Manufacturing LIMS Market

Pharmaceutical & Biotech
Refining
Water & Wastewater
Shipments by Deployment Mode
Shipments by Distribution Channel
